

Spaces worthy of your best work

Architectural Walls Overview

Herman Miller Certified Dealer

Architectural Walls Overview

American Office is more than great quality furniture. We offer a variety of interior solutions, including architectural walls, which provide visual and acoustical privacy as well as an attractive way to define space. Our team will work with you to design the space that fits your style, budget, and functional needs.

What wall lines do we carry? Muraflex, Kl, Environamics, Trendway, Herman Miller, and Knoll

Why do we carry them? We don't believe "one size fits all". Our wall lines offer different features, options, and price-points so we can tailor them to fit each customer's needs.

How can we help? From beginning planning phases to project completion, we provide information and tools to help you make an educated decision on what is best for your space (i.e. product tours, design support, pricing, technical details, drawings, project management, and experienced installation services).

Muraflex offers a wide range of demountable wall products largely recognized for their frameless glass wall systems. They are manufactured in Montreal, Canada, and provide sleek European design in a North American made product.

WALL LINES INCLUDE:

FINO

An elegant, thin-profile frameless glass wall system designed with strong acoustical privacy in mind

MIMO

A minimal, modern frameless glass wall system providing flexibility within the track to quickly meet the changing needs of today's workplace

QUADRO

With its picture frame-like details, this wall outlines every elevation as though it were a piece of art

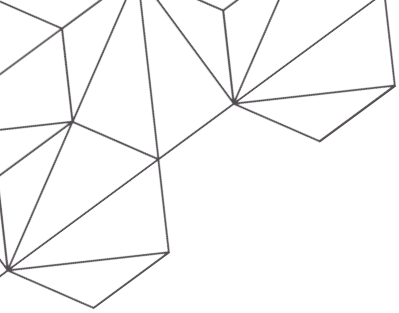

EXPO

A telescoping glass wall system that instantly allows you to fully open the wall to create an inviting, engaging, open space or close the glass wall for a more private setting

PLANIKA

Solid, non-glass wall system which pairs with their glass wall lines to create a fully flexible and versatile space

KI architectural walls strike the perfect balance between design and function. The result is an environment that is visually inspiring and seamlessly functional. KI offers quick installation, minimal construction and waste, ease of reconfiguration, and thoughtful design elements.

WALL LINES INCLUDE:

GENIUS

Customizable wall system in a unitized or fully assembled wall panel with a product depth to achieve any look in any environment; total design freedom

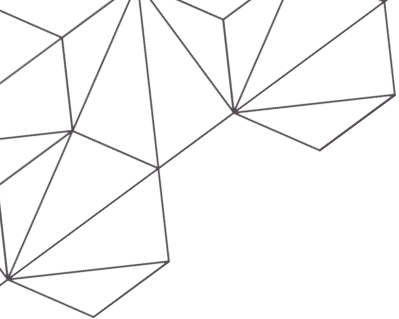

LIGHTLINE

The first frameless and unitized glass system dedicated to the enhancement of light. Thinner, smaller, rectilinear profiles go practically unnoticed.

EVOKE

Breakthrough alternative to drywall that installs faster with a stronger acoustical privacy than drywall

Beautiful, high-quality architectural interior walls at a fair price with the fast lead times to help you build your space quickly avoiding the long process of fixed construction.

WALL LINES INCLUDE:

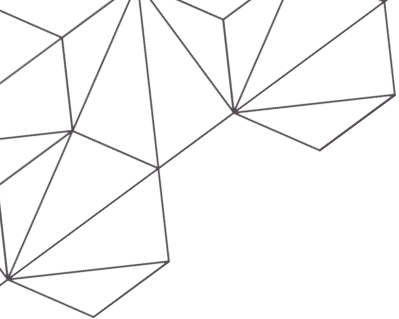

SYMBIO

Moveable walls designed for change; flexible and future-ready. Symbio offers a highly customizable product in a unitized wall panel for fast installation and ease of reconfiguration as your needs change.

SLIMLINE

Sleek and sophisticated frameless glass wall system with a thin profile and minimal lines

Trendway >

Three wall products that work together to achieve the price, privacy, function, and appearance you need.

WALL LINES INCLUDE:

VOLO

Volo brings your space to life with speed, ease, and performance. Volo is a unitized wall system which is tailored to fit the wall, door, and hardware requirements you want with the practical advantages of movable walls.

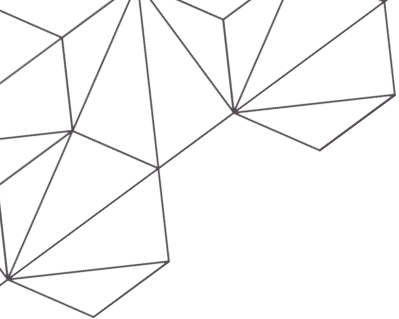

VOLO FRAMELESS

This frameless glass wall system divides and defines space beautifully. The pure flow of glass storefront and transparent corners complements any architectural setting.

TRENDWALL

A more sustainable solution than drywall, ensuring reduced resource consumption and less waste to landfill. Trendwall provides a smaller product offering to keep costs to a minimum.

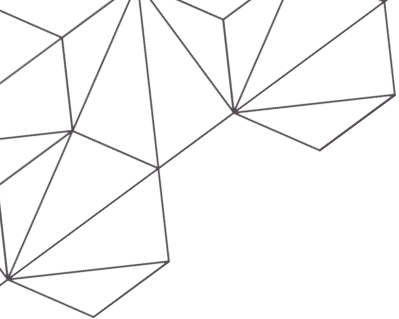

HermanMiller

Designed to transform an open floorplan, Overlay is a partial height wall solution made of a minimal kit of parts to help you define your space by creating freestanding rooms or just simply divide space. Due to its simple panel based design, it is fast to build and easy to relocate to redefine space overnight as needs change.

OVERLAY

Overlay creates unique, customizable spaces ranging from small individual focus areas, to group engagement areas, to more private enclosed meeting spaces.

Knoll

Delineate and collaborate with Knoll's freestanding wall system to redefine your workspace quickly and easily as your needs change.

ROCKWELL UNSCRIPTED CREATIVE WALL

Incorporate accessible privacy that complements the existing floor plan. Enclosures can be planned as individual spaces or as a series of fluid zones. Customizable panels offer varying degrees of visual and acoustic privacy, dampening noise, and minimizing distractions.
