## Divide Clarus

### DIVIDE

Collaborative, open-air desks will soon be a thing of the past. Employees are now looking for their own protected and divided workspace. Clarus products, Divide, acts as a rough-hewn barrier between workspaces and can be customized to match various heights. One cover of our products, we can custom match any glass color to coordinate with your existing furniture systems. We also offer translucent or opaque glass finishes.

[Learn more about Divide](#)

## Health Shield Clarus

### HEALTH SHIELD

Bring your next-generation ideas and create something unique to your office with Clarus Health Shields. Clarus Health Shields are not a temporary single screen barrier between workstations and visitors that can be easily placed and dismantled. It's the important to not settle for a generic material that is hard to install. These shields are made of acrylic and polycarbonate barriers and are easy to install.

# Screens Freestanding

## Urban Wall Room Dividers Merge Works

## Thermobile Clarus

### THERMOBILE

TherMobile, a non-porous mobile board that serves as a protective shield during the health screening process, is your first line of defense against COVID-19 at the office. How will you take the temperature of your employees from a safe distance or handle recovery documents at the entrance? TherMobile shield out-out while allowing you to be sure. This all through a non-porous, easily cleanable entry shield. Thanks to the natural properties of glass it can be sanitized completely protecting all parties during health screenings.

## Ther Mobile Clarus

## Flex Wall Clarus

### FLEX™ WALL

The Wall is a free-standing, ground-level wall system with a fully integrated, modular design that allows you to roll into the room. The built-in wheel system allows The Wall to roll easily from room to room. This, the revolutionary design, seamlessly transforms into a dark, free-standing, AIAA compliant wall partition. The Wall has been tested for use in temporary boardroom or office space without having to remove electrical or HVAC systems.
